DETAILED ACTION

In response to the Letter received on August 12, 2002, Paper No. 5, the following is noted: In view of the error made by the Examiner, the previous Office Action Paper No. 3, is hereby vacated and the following action is substituted:

- 1. Claims 24-26, and 36-59 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-29 of U.S. Patent No. 6,270,625. Although the conflicting claims are not identical, they are not patentably distinct from each other because of an obvious difference in scope of the claims. The property altering additive and the variable characteristic in the cross machine direction of the present claims are open and obviously inclusive of the color stripes in the method claims of the patent.
- 2. Claims 24, 58 and 59 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Application/Control Number: 09/880,594

Art Unit: 1731

The claim 29 is incomplete since the last line of the claim should state that a paper with variable characteristic is produced.

Each claim should also state that the property altering agent is concentrated in regions extending the cross machine direction to produce the cross machine variable characteristics.

3. The cited references show the state of the prior art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Chin whose telephone number is (703) 308-2046. The examiner can normally be reached on Monday through Friday.
